Federal regulations require that all instruments serviced must be free of radioactivity & biohazards.

It is the policy at Pipette Calibration Services, Inc. (PCSI) to safeguard the safety and health of our employees. To enable a safe work environment PCSI requires all pipettes (measuring equipment) to be decontaminated from hazardous materials such as: biological, chemical or radioactive residues which the pipette may have been exposed to during use.

By completing this form you are stating that the pipette (measuring equipment) does not contain any harmful residue and is safe for PCSI employees to clean/repair and calibrate.
